

The Perfect Pair

Chewable and Cubed

A diverse drink menu needs more than one type of ice. You wouldn't put nugget ice in a glass of Pappy van Winkle, but you probably don't want to use square cubes in a spiked Cherry Limeade. Your bar needs both cubed ice and chewable ice to cover the full range of your beverage offerings.

Nugget Ice by Hoshizaki

- One of the most popular ice types in America, A.K.A. "Sonic ice"
- Soft, chewable, and packs tightly in a glass
- Ideal for fruity, frozen, and blended cocktails—goes easy on blender blades

**The Square Cube** by Hoshizaki

- Classic look, perfect for both premium straight pours and signature libations
- Slow-melting—keeps beverages cold, strong, and attractive longer

**The Regular Cube** by Manitowoc

- Unique rhomboid shape adds personality to any drink
- Won't water down top-shelf liquor too quickly
- Ideal for quirky cocktails and off-beat bars

**The Sphere Cube** by Hoshizaki

- Only one per glass needed, thanks to its size
- Adds instant sophistication to straight liquor and cocktails
- One of the slowest melting ice types and the most eye-catching

**Pearl Ice** by Ice-O-Matic

*available in select markets

- Known as "the People's Ice"
- Crowd favorite for its chewability
- Soaks up drink flavors, helping your best cocktails leave a lasting impression

**The XL Square Cube** by Hoshizaki

- Biggest and slowest melting square cube on the market
- One per glass is all you need
- Helps you create unforgettable cocktails your customers won't find elsewhere

**The Full Cube** by Kold-Draft

*available in select markets

- The only perfect square in the commercial ice world
- Dimple-free and dense
- Perfect for high-end bars with refined menus
